OVERVIEW

J Michael Consulting (JMC) delivers end-to-end support in surveillance informatics, helping public health agencies enhance their data systems and modernize their surveillance infrastructure. Our team leverages extensive experience in public health to provide tailored solutions that improve data quality, accessibility, and impact.

CORE CAPABILITIES

System Assessments

- Comprehensive evaluations of existing surveillance systems to identify strengths, gaps, and opportunities for modernization

Acquisition Support

- Strategic guidance on technology procurement, including requirements definition, vendor evaluation, and solution planning

Technical Assistance

- Customized support to optimize workflows, integrate data sources, and improve system performance in collaboration with CDC, APHL, and CSTE

Training & Education

- Hands-on, role-specific training designed to build work force capacity and ensure sustained system use and effectiveness

Data Science & Analytics

- Support for advanced analytics, data modeling, and visualization to inform public health decision-making

System Implementation

- Planning, deployment, and post-launch optimization of surveillance platforms that meet evolving public health needs

DIFFERENTIATORS

- Highly collaborative, adaptable, and values-driven team with deep public health expertise
- Direct involvement in major initiatives such as AFIX, FluLIMS, and LIMSLite
- Proven success supporting state, local, and federal health agencies with mission-driven, outcome-focused services
